/Jocus taga "MADONOI"
//Jocus "MADONOI daa, from Mycobacterium tuberculosis strain H37Rv, (99.6% identity in 507 aa overlap). ChaA, chromosomal replication intiator protein (see citations below), equivalent to other Mycobacterial CHROMOSOMAL REPLICATION INITIATOR PROTEINS e.g. P46388 |DNAA MYCLE from Mycobacterium paratuberculosis (502 aa); P49992 |DNAA MYCRA from Mycobacterium paratuberculosis (503 aa); P49992 |DNAA MYCRA from Mycobacterium snegmatis (504 aa); Q91771 |DNAA MYCRA from Mycobacterium snegmatis (504 aa); P49992 |DNAA MYCRA from CHROMOSOMAL REPLICATION INITIATOR PROTEIN from Streptomyces carrysomallus (624 aa); Q92H75 |DNAA STRRH to others except in N-terminus e.g. Q92H75 |DNAA STRRH from Streptomyces carrysomallus (624 aa); Q92H76 |DNAA STRRE from Streptomyces catrysomallus (624 aa); Q92H76 |DNAA STRRE from Streptomyces catrysomallus (624 aa); Q92H76 |DNAA STRRE from Streptomyces reticuli (643 aa); DNAA ECOLI |P03004 |B3702 chromosomal replication initiator protein from Escherichia coli strain K12 (467 aa); ABARA SCOLI |P03004 |B3702 chromosomal replication initiator protein from Escherichia coli strain K12 (467 aa); ABARA SCOLI |P03004 |B3702 chromosomal replication initiator protein sequence interfactoria supmature. BELONGS TO THE DNAA FAMILY. Note that the first base of this gene has been taken as base 1 of the Mycobacterium bovis genomic sequence."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         /Jocus tag="Mab0002"
